PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience in building scalable web applications using modern technologies such as Angular, React, and Node.js. Recently developed a strong interest in Artificial Intelligence and Machine Learning, with foundational knowledge in ML, NLP, and Generative AI concepts. Seeking opportunities to leverage software development expertise while growing in AI/ML-drive solutions.

Portfolio: [Portfolio](#) | LinkedIn: [LinkedIn](#) | GitHub: [GitHub](#)

SKILLS

- Front-End: HTML, CSS, JavaScript, ES6, TypeScript, Angular, React, Bootstrap, Material, Less, Sass.
- Programming Languages: Java, C++, C#, Python, JavaScript, TypeScript, HTML5, CSS3.
- Prototyping & Design Tools: Figma and Adobe XD.
- APIs: Integration and consumption of RESTful services and legacy network services.
- CMS & E-Commerce: Shopify, WordPress.
- Code Quality: Experience with ESLint/TSLint for code quality and standards.
- AI/ML Skills: AI Fundamentals, Machine Learning basics, NLP basics, Generative AI concepts, Prompt Engineering, Python (basic), NumPy, Pandas, Jupyter Notebook, Git
- Database Management Software: PostgreSQL, MySQL, MongoDB
- Frameworks/Libraries: Proficient in Angular15+, ReactJS, Vue.js, Bootstrap, Material.
- Version Control: Proficient in Git, SVN for version control and collaboration.
- CI/CD: Familiar with Jenkins for continuous integration and deployment.
- Other: Microsoft Office Suite, Excel (data cleaning, formatting, and analysis), documentation & SOP creation

WORK EXPERIENCE

UX/UI & Fullstack Developer, 05/2023 - Current

Pushpak Consulting - Freelance

- Project Title: JewelMarketer – Digital Marketing & Campaign Management Platform

- Developed a full-stack digital marketing and customer engagement platform for DMS jewelry retailers. The system enables marketing teams to launch personalized campaigns, segment customers based on purchase behavior, and analyze campaign performance in real-time.
- Key Contributions:
- Designed and implemented RESTful APIs using Spring Boot for campaign management, customer segmentation, and analytics.
- Built a responsive, role-based Angular dashboard for campaign creation, scheduling, and reporting.
- Modeled customer and campaign data using MongoDB, enabling flexible targeting and real-time insights.
- Integrated JWT-based authentication and Spring Security for secure access control across admin and marketing roles.
- Developed dynamic reports and visualizations using Chart.js, including email open rates, click-through rates, and conversion tracking.
- Implemented embedded lead generation forms and auto-responder logic for customer acquisition.
- Used Swagger/OpenAPI for API documentation to support collaboration across frontend and backend teams.
- **Tech Stack:** Angular, Spring Boot, Java 17, MongoDB, Spring Security, JWT, Swagger, Chart.js

Software Developer, Front-End Development, 04/2021 - 04/2023

Lemon Technologies

Project Title: Diatech-SGI

Company Overview: Here, I worked as a developer in an agile team that develops and maintains retail life cycle management software for Diamond/Gems. It is a web-based software that has global client/user base, Offering features such as inventory tracking and management, Sales order management, Sales analysis & optimization tools, Client on-boarding, etc.

Key Contributions:

- Requirement & technical analysis, defining deliverables.
- Designing UI, coding UI modules and components, injecting APIs/Services, Integrating & testing end-to-end product.
- Communication with Business and different teams, handling Business requests / enhancements.
- Active Production Support, next generation app's development & testing.
- Performing Production Implementations / Releases.
- Used for software development Angular14+, creating custom components, directives, decorators, and services to interface with both restful and legacy network services.
- Used Angular and implemented with animations, routing, and states.
- Solid experience in using React lifecycle methods and developing react components stateful and stateless, higher order components.Used ReactJS with Redux to separate the data and presentation layer.
- Utilized Redux stores to handle the states and update the UI.

- Designed dynamic and browser compatible pages using HTML5, CSS3, jQuery.js and Vue.js.
- Developed code to call the web service/APIs to fetch the data and populate on the UI.
- Developed fully responsive web application using bootstrap, material frameworks and writing media queries.
- Setup for Jasmine and Unit Testing of JavaScript.
- Performing KTs.
- **Tech Stack:** Angular 13+, JavaScript, TypeScript, Karma, Protector test engine, Ext.js, Node.js, HTML, CSS, Bootstrap, Swagger, SVN, Git, Jira, etc.

Web Developer, Front-End Development, 02/2021 - 04/2021

Cirkel Studio

- Develop and maintain shopify websites.
- Assisted in implementing new features.
- Work closely with the design team to ensure website aesthetics.
- Conducted website testing and resolved bugs.
- Coded websites using HTML, CSS, JavaScript, jQuery, Ajax, and Shopify liquid languages.

EDUCATION

Bachelor of Engineering: Computer Science Engineering, 01/2021

Gujarat Technological University - Ahmedabad, India

Diploma: Computer Engineering, 05/2018

Gujarat Technological University - Ahmedabad, India

CERTIFICATIONS

Udemy

- Intro to AI: A Beginner's Guide to Artificial Intelligence - April 2026

LinkedIn Learning

- Figma for UX Design – July 2024
- Building a Reactive App with Angular and Spring Boot 2 – July 2024

INeuron

- Data Science Architecture – May 2020
- Python for Data Science – May 2020

Coursera

- Create Your First Python Program – June 2020
- Getting Started with AWS Machine Learning – May 2020

ACCOMPLISHMENTS

- Recognized as an employee of the year for two consecutive years at previous employment.
- Gold medalist in bachelor's degree.
- Best student award in High School.
- Recognized & awarded for sport: Badminton
